

Institutional green policy

The institution is located in the rural area and has always believed in preserving a green and healthy atmosphere. To keep an eco-friendly campus. Every effort is made to maintain carbon dioxide neutrality by planting trees and plants of various types. The magnificent landscaping of trees and plants not only creates a pleasant study environment for students but it also draws the attention of visitors to the campus.

Some of the efforts done to provide a clean and environmental friendly environment or as follows

1. mode of transport : students are advised to take public transportation to go to and from Campus. Bicycles can be parked in separate areas.
2. Plastic free campus: the management advocates for a plastic free campus. Various campus groups. Arrange Events to raise awareness about the negative impact of plastics.
3. Carbon neutral initiatives: emphasis is laid on paperless offices to save carbon emissions in printers. Reuse of one side paper printouts is encouraged. Use of biodegradable papers is encouraged utilisation of ERP software and ICT facilities paperless administration. The college communicates primarily through the institution's domain mail ID and WhatsApp group. CRT monitors are replaced with LCD monitors and biometric attendance is used.
4. Rainwater harvesting: borewell recharge and nearly – read water harvesting. Pits are installed for proper rainwater, accumulation and absorption.
5. Environmental management: the institution of trumps, sound environmental management, policies and practises by following the state and central government standards, reducing and avoiding pollution, adopting objectives for increasing environmental performance based on thorough assessment of adjusting environmental demands
6. Green cover management: this should initiate the prompt action that allows for more days covering. The institutions, NSS, promote and raise awareness about the importance of green covering on campus. The following initiations have been taken every year.
7. Energy management: nine situations and shows the connection of Loan. RG by installing LED bulbs, automatic sensor-based lights, solar panel and solar street lights.
